Welcome to the 4<sup>th</sup> Georgia 3D Fest, sponsored by the Atlanta Stereographic Association. We have tried to include a little bit of everything – different formats, a range of subjects and both contemporary and historical images. Please look around the Exhibit and Trade Fair in the Henry Oliver Room when you aren't watching a show or a workshop in the Swanton Amphitheatre. We will also have three docent talks discussing the exhibits during the day.

These are exciting times for 3D. IMAX and RealD are bringing 3D thrills back to the movies with shows such as "NASCAR" and "Space Station" and animations such as "Polar Express" and "Monster House". There are new 3D cameras and viewers and home digital 3D projection is becoming a reality. You can see a lot of it here today and the rest on websites listed in this booklet.

We have a full schedule of digital projection from 5:30-8 PM this evening in the Swanton Amphitheatre. We will be projecting with twin Optoma EP910 projectors with native resolution 1400x1050, 3500 lumens brightness and contrast of 3000:1! We are presenting two hours of the best programs from around the world.

We can't cover everything in a one-day event, but that just gives you a reason to come back next year or to join the ASA, NSA, ISU or PSA Stereo Division to get more 3D! If you have any questions, just ask anyone with an ASA name badge.

So look around in both rooms – the schedules are posted and are also in this program. Whether you are an experienced 3D-er, a potential recruit or just enjoy viewing 3D images, there should be lots to enjoy. We appreciate your coming by and sharing our passion for 3D!

PS<sup>1</sup>: To avoid disrupting the projections, please don't enter the theater while a show is in progress – wait until a break. Thanks for your consideration.

PS<sup>2</sup>: If you parked in the Decatur city lot under the Conference Center, be sure to get your discount parking coupon from the registration table.
